

LEDsBIKE COMPACT REAR

Intelligent brake light

For greater visibility in road traffic

Ride longer without worrying about battery life

Ideal for daily commutes and extended tours

Automatic mode

For intelligent adjustment

StVZO street legal

Approved according to German StVZO with K-Mark for on-road use

Be seen – day and night

The intelligent LED rear light with brake light function combines modern design with functionality. Two modes offer flexible lighting options: automatic mode for intelligent adjustment and continuous light for constant visibility. No matter which mode you choose, the integrated brake light is always active. An integrated sensor instantly detects braking and alerts traffic behind you with a bright flash. With up to 13 hours of battery life and only two hours of charging time via USB-C, you're always ready for your next ride. In addition, a charging indicator lets you know when it's time to recharge. The slim, lightweight design fits perfectly on any bike. Thanks to the flexible mount, installation is quick, easy and tool-free. And because adventures don't end when the sun goes down, the rear light is IP54-rated for protection against water and dirt.

Backed by a 2-year OSRAM guarantee¹⁾, it's the ideal choice for cyclists who want more than just light: safety, comfort and a design that impresses.
